

# Heat Exchangers

## Finned Tube Coils type ALW

### Description

The aluminium Finned Tube Heating Coils are produced from Trufin® Finned Tubes W/H or W/HT. Due to the compact design and the optimum ratio of inside-to outside surface area big capacities can be achieved in a narrow space.

### Application

Finned tube heating coils of aluminium are used:

- in the heating industry as primary heat exchangers for condensing boilers

as heat exchangers in the automobile industry as well as in plant and apparatus engineering and machinery construction

	Inside	Outside
Medium	Liquids	Gases, liquids

### Materials

Finned tube	Aluminium
Connection fitting	Aluminium

## Approvals

Schmöle is in possession of a certified Quality Management System to DIN EN ISO 9001 and of an approval to Pressure Equipment Directive (PED) 97/23/EC.
